Mr. Harry E. Fitzwater
Deputy Director of Administration
Central Intelligence Agency
Washington, DC 20505

Dear Mr. Fitzwater:

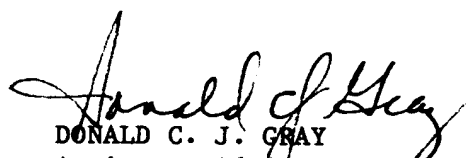

The General Services Administration (GSA), Interagency Fleet Management System (IFMS), and the National Highway Traffic Safety Administration (NHTSA), have a contract with the Ford Motor Company for the purchase of 5,000 Ford Tempo sedans equipped with an operator air-bag safety system. These vehicles will be part of a project to demonstrate the availability of air-bag systems in certain vehicles manufactured today. Federal sector involvement in the use of air-bag systems will enhance the general public's overall acceptance of these safety devices. The vehicles will be distributed throughout the IFMS for use in a wide variety of geographical and operational conditions.

To obtain accurate and timely project information and to properly evaluate the effectiveness of these air-bag systems, special accident reporting procedures will be instituted for users of these vehicles. Immediately after an accident, no matter how minor, the appropriate GSA Regional Maintenance Control Center (RMCC) or the NHTSA toll free number should be called (see attached listing for all appropriate telephone numbers). After contacting the RMCC, the vehicle operator will be instructed on where to take the vehicle and provided guidance on completing the written accident report. The vehicle may also be inspected by a representative from the NHTSA.

Our Fleet Management Centers will be providing more detailed information to your regions and field activities in the near future. It would assist our efforts considerably if you would contact your field activities to inform them of this project and the importance of their cooperation.

Your participation in this project and assistance in making it work will be greatly appreciated. Any questions from your staff should be directed to Mr. Michael Moses on FTS 557-1288 or (703) 557-1288.

Sincerely,

DONALD C. J. GRAY
Assistant Administrator
